

KaCe B's LLC

KaCe B's Salt Scrub is an all natural product. Made with Dead sea salt, organic coconut oil, Raw shea butter and essential oil. All of these ingredients have been shown to have natural anti-aging as well as anti-bacterial properties that are naturally occurring. It's great for people who have sensitive skin or skin conditions such as eczema. It comes packaged in a re-usable or recycle-able glass jar.

KaCeB's LLC, Owner/Founder Kris Belile

I started KaCe B's in 2013 based on growing requests from friends and family that I would make my products for. I would often make gift baskets for Holidays or special events. I have always had a love for natural beauty products but often found their efficacy wasn't what I needed it to be. I am a Nurse Practitioner and an environment where you have close personal contact with people all day, you really need to have confidence in hygiene products. That combined with my background in science, led me to start looking for ways I could make these products myself. It has been such great fun and I just love that others find these products meeting their needs while still not using harsh chemicals. Achieving great results through nature. That's what KaCe B's is all about!
