

## Welcome to the Squeaky Peasant

We specialize in high lathering, great smelling, natural handmade soaps. Squeaky Peasant soaps are based in Olive Oil and Shea Butter. Our additives are organic. All Florals and Herbs are grown in our own garden. Our colorings are natural pigments. The delicious smells are all food grade essential oils. But don't eat it no matter how much you are tempted. It's still soap!

Squeaky Peasant soaps lather really well, smell delicious, are beautiful to look at, and have a slight attitude. It took years of soap making to get the formulas just right. And that work really paid off.

My goal starting out was to provide natural skin cleansers to people who are fighting disease or cancer, have compromised immune systems or simply want an alternative to bathing with a lot of chemicals.

I defeated breast cancer, my father defeated lymphoma, and my mother lost a long battle with colon cancer. Chemotherapy left her body very sensitive to chemicals. All commercial soaps made her itch. After brainstorming with my sister, The Squeaky Peasant was born. We take great pride in our soaps. It feels good to offer a soap alternative that is still affordable. We hope you enjoy using your Squeaky Peasant Soaps and look forward to providing you and your family with many happy showers and baths. We would love to hear from you.
